Motion Censuring Varsity Defeated

TORONTO (CUP) — The Students' Administrative Council of the University of Toronto defeated a motion to censure THE VARSITY for cutting party platforms before last week's Model Parliament elections.

The motion criticized the paper for not including the full statement of policy requested from every party.

Much of the discussion centered around an editorial supporting the CCF. Mention of the editorial was cut from the censure motion after it appeared that most representatives felt they should not meddle with the paper's editorial policy.

A letter to the council from

Dr. Wilder Penfield Speaks Today On Medical Prospects

Dr. Wilder Penfield, Director of the Montreal Neurological Institute and Chairman of the Department of Neurology and Neurosurgery at McGill will address the Pre-Medical Society at 1 pm today. The address will be given in Room 250 of the Biology Building. Dr. Penfield will speak on "Medical Prospects".

Dr. Penfield has had a distinguished medical career and is best known for his achievements in the field of neurological research and surgery. He has also done extensive work on epilepsy and has published several books on this subject, his latest being 'Epilepsy and the Functional Anatomy of the Human Brain'. Dr. Penfield has written a novel, 'No Other Gods', which was widely acclaimed in literary circles.

All students who wish to hear Dr. Penfield's lecture are urged to come as early as possible.

the Campus P.C. Club president, Del O'Brien, cited the editorial and cutting as "contrary to all canons of journalistic ethics".

O'Brien said the club had received assurances the platforms would not be cut. He charged he had "considerable documentary evidence" to prove there had been discrimination in news coverage of campus political activity.

Editor Michael Cassidy claimed no assurances had been given that the articles would not be cut.

Supporting the paper's stand, Nancy Sloane said that the only people hurt by the partisan editorial were the executives of the two parties criticised.

"The majority of the people I talked to thought it was a good thing for the editor to take a stand," she said.

Position Of West Topic Of Debate

"Resolved that the West has lost" — will be the topic for today's verbal battle at the Union.

This is the first in a series of five "On Campus" debates to be presented under the auspices of the Debating Union this year.

Today's debate will feature, on the affirmative, Nundi Gewurz (President of Hillel) and Michael Kinsman, and on the negative, Bernard Schiff (last year's Bovey Shield Winner) and Peter Millard (winner of the Papineau-Talbot Trophy).

The debate will be presented at 1:10 pm in the Walter M. Stewart Room in the Union.

3 Experimentals Will Be Produced By Players' Club

The Players' Club will present three experimental plays for its second term production.

Three one act plays, written and directed by students, will be presented in the Union Ballroom in arena style. The three plays are: "The Glass Man" by Beverly Rosen, "The Fatalist" by Silvia Bernard, and "The Minotour" by Daryl Hine.

A panel including Walter O'Hearn, drama critic of the Montreal Star and Norma Springfield, Director and co-owner of the Mountain Playhouse, together with Professors Sommers and Dudek of the English Department, will review the plays after the performance on opening night. The plays will be presented Feb. 28, March 1 and March 2.

U. Of T. Loses Tenant As Argos Move To New Site

TORONTO (CUP) — The Toronto Argonaut Football Club plans to sever their connection with Varsity Stadium, owned by the University of Toronto, with the advent of the 1959 football season.

\$77,000 a year in athletic association revenue will then be taken from within access of the university's intramural athletic programme.

Reasons for leaving Varsity Stadium are the rental cost of the stadium, lack of parking facilities nearby, and inadequate public transportation.

This situation suggests the fact that there is a relationship between the Alouettes and Molson Stadium similar to that which has previously existed between the

U. Of M. Receives Municipal Subsidy

McGill Fails To Receive A Penny As \$25,000 Grant Voted By Council

The Montreal City Council yesterday approved a grant of \$25,000 to be divided equally between the Loan of Honour and the Scholarship Committee of the University of Montreal.

The Loan of Honour is a campaign throughout the City and its districts, including both the French and English speaking population, to raise funds to provide scholarships to needy students. It is a part of the Society St-Jean Baptiste.

The grants will be taken from

the Social Welfare Department's budget. The money would go only to students residing in the City.

The bill proposing the grant brought a mixed reaction from city councillors. Factions of the council said that they approved of personal contributions to these funds, but that since education was not in the hands of the Municipal Administration the taxpayers' money should go only for administrative purposes. On the other hand, the councillors who favoured the motion stated that any help for needy students was a worthy step and should be taken.

Dangerous Precedent

The Council was warned by one councillor that this grant might be a very dangerous precedent as only one University will be favoured; McGill University would not receive a cent. It was urged that a committee be formed to study the matter and to perfect a plan whereby all students would benefit.

Committeeman Pierre DesMara said that even if the council did have the right to make such grants, the grant was too small and therefore should not be passed at all.

Equal Treatment

When contacted at City Hall, a councillor, who wished to remain anonymous, replied to the Daily's question as to whether the City Council should have passed this bill to benefit the U of M and not grant the same amount to McGill. He stated, "What's good for one is good for all. All Universities should be treated equal. The council should not have passed this bill to benefit the University of Montreal while passing over McGill."

Councillor Hugh Hanson, "C" category councillor, who represents McGill on the City Council, was not available for comment.

African Students Host Gala Party In Union Tonight

"Focus on Africa", an evening of African life, song and dance will take place tonight at the Union.

Sponsored by the African Students' Association, the U.N. Club, and WUS, the program will begin with an African-style meal at 6:30 pm in the Union cafeteria. The price of the dinner is \$1., proceeds going to the WUS Scholarship Fund.

African Food

The dinner will consist of dishes specially prepared by McGill's African students, and will include ground nut soup, chicken and rice, and beer, brewed after the Ethiopian fashion.

The meal will be followed by a discussion entitled "The Democratic Dilemma". Participants Bernard Chidzero, an M.A. from Southern Rhodesia, and Timothy Porteous will consider the problems of applying democracy to the African colonies. Porteous, a law student at the U. of M. spent last summer at the WUS seminar in Ghana.

After the discussion, African students will present an exhibition of dancing, drumming and folk singing from Ghana, Ethiopia, and Nigeria. The program will conclude with a party featuring Nigerian "high-life" jazz.

"Focus on Africa" will also include a display of native carvings, masks, drums, and idols in the Union lounge today.

Argos and Varsity. Attendance at intercollegiate athletic events at both universities has been declining during the last seven years, while at the same time, more people are attending professional athletic contests. This has made the athletic departments increasingly dependent on revenue from professional crowds.

According to Harry Griffiths,

DEADLINE EXTENDED

Applications for the W.-U.S. summer seminar will be received until Friday, January 24.

Applicants are asked to apply to the SEC office to give the information required by the selection board.

Director of Athletics at McGill University, "Our revenue from the Alouettes is definitely as great as that received by the University of Toronto from the Argonauts."

"Molson Stadium is certainly open to building possibilities providing that the Als will come to an agreement," said Mr. Griffiths. "The Stadium could be expanded in the east end to accommodate 27,000, the same number as Varsity Stadium now holds."

Athletic fees at Toronto could rise to eighteen dollars if the students were forced to absorb the loss caused by the Argos' shift.

The new home of the Argonauts will be Toronto's CNE grandstand where plans for modification and addition were recently announced.

Editorials

Hurrah! The Super Race!

This is an enlightened age. Men and nations stand by the credo that "All men are created equal." There are not many people alive today that would deny that claim outright. There are, however, some who would like to alter that statement to read "All men are created equal, but..." It is unfortunate that sometimes we do not have to go far afield to meet such people.

As newspaper editors, we come into contact with men of many origins, and in many walks of life. From time to time, we find that we are conversing with a believer in the "Super Race" theory. As this is a city of two peoples, the French Canadian people is often the one singled out as an example of an inferior race.

Of course, since the fall of Hitler these exponents of the "Super Race" theory do not refer to themselves, or even consciously think of themselves, as members of a "Super Race." Instead, they argue that the French Canadian is better than the English Canadian in some ways, and that in turn, the English Canadian is better in other ways. The French Canadian is proficient in woodcarving and folk-dancing; the English Canadian is better in administering and governing. The argument invariably ends with the statement, "Some of my best friends are French Canadian..."

The arguments are inane, stupid. Inane, that is, to everyone except the man stating them, and to the French Canadian, who fears that he might one day find a man holding these views in a position of authority. The fact that there are people with such views should also be important to us — both as English Canadians and as believers in true democracy. For as long as there are men who believe in the "Super Race" idea — however modified — there will be men who will look with distrust upon all of us.

Let's Grow A Culture

Two great Universities stand on the slopes of the same mountain.

Canada looks to them for leaders and they look back at Canada.

But in opposite directions one North and the other South.

Like two sulky children they stand back to back and pretend not to see each other.

Most of the time.

If we had a million dollars to spend for Canada we should not give it to

Charity or Hospitals or Research or Politics.

For we should spend our money on a building somewhere between the Two Solitudes on the same mountain.

And it would belong to both and be called the New Union.

It would be a fine place and worth visiting often.

And maybe one day a new Culture would grow there.

Not the type that grows on stale tea or decaying pea soup.

Or the type people patronize at parties.

But the vital type that is fed on understanding and grows out of ideas, mixed merged and hybridized but unmistakably Canadian.

If we had a million dollars.

Letters To The Editor

Too Many Reserves?

Sir:

In a recent DAILY article concerning the library, the system of student fines for "forgetting" to return books was explained. The "definition" of a reserve book was also given. They "are the ones which the professors place on their reading list". But is there no limit to the number of books that professors may so place on the list? In some courses there are a large number of books that are so placed; but many of them are obscure, they are not taken out very often and consequently other students are deprived of their privileges.

I am not trying to abolish the "reserve system" but a little more thought should be exerted before a book is placed on reserve. Not only what the advantages are to the students that might be taking a course but also the disadvantages to the others in the university. Perhaps some will argue that two days is enough for a book — then all books should be on reserve. There will then be no discrimination.

As the present system now stands we should have only those books on reserve that are necessary. The average Science student does not get the chance to read much of the so-called Literature in his courses. But should he be denied this opportunity because he cannot borrow a book for more than two days? The average Scientist does not have the time to devote two complete days in reading a book that he wishes and leave the rest of his work aside.

Recently I wished to borrow the book "Major Barbara" from the Redpath Library. The book was on reserve and I managed to read the book in the required period. My purpose was defeated, however, for it was more like reading a required book in English 100 with a definite time limit than like reading a book at my leisure. This is fine enough if the book merits to be on reserve. As it is, the book has been taken out 41 times but over a period of twenty years.

This is an average of two times a year. Furthermore the book was not taken out over the periods 1944-46; 1946-48; 1948-54. These are periods of two, two and six years respectively. There are, I am informed at least four of these books at the Redpath Library. All the librarian could tell me was that he does not have anything to do with the placing of reserve books. This situation also exists for numerous other books.

The book, by the way, is reserved for English 331, a course on Continental and European Drama from Ibsen to the Present. Is the professor allowed to put every book that is only vaguely connected with his course on the reserve list? Need I say more?

Fred Seligman, B.Sc. III.

Art of Engineering

Sir:

In Professor Hebb's lecture last Friday, ("Psychology and International Affairs"), he stated that the application of a principle to the needs of humanity is an art. The man who discovers and works out the principle however, is a scientist. As examples he cited psychology as a science and psychiatry as an art.

It seems logical from these definitions that the men and women who apply physical science to the problems confronting mankind are likewise artists. In other words engineering is nothing less than an art.

Since this is the case, the traditional rivalry that exists between engineers and artists is entirely unfounded. Both are exactly the same damn thing!

tomorrow's challenge...

your opportunity today

Can you qualify?

If you who are about to graduate from university... are looking for a career offering responsibility, challenge and opportunity... you are eligible to apply for aircrew in the RCAF.

In this fast moving nuclear age, the Royal Canadian Air Force is more than ever dependent on graduates with a record of scholastic achievement, qualities of leadership, the aptitude for flying and the ability to apply technical and administrative skills.

These are the men who have the greatest potential to become Aircrew Officers — who have the most to gain from making a career for themselves in aviation with the RCAF.

Investigate the tremendous opportunities this great service offers; — contact the RCAF Resident Staff Officer on your campus. Talk it over and learn, too, the details of financial assistance plans available to university students.

Nine Universities Given Grants By Canada Council

KINGSTON—(CUP)—Nine Canadian universities will receive grants from the Canada Council of the Arts to aid in the expansion of their existing work.

The announcement followed a recent discussion by the Council of assistance to Canadians working in the fields of writing, music, visual arts and the theatre.

LARGEST SUBSIDIES

\$700,000 has been granted to the University of British Columbia for an Arts building. Queen's University will receive \$530,000 towards a new men's residence, library, and reading room. Carleton University of Ottawa has been granted \$400,000 for a new library.

The Honourable Brooke Claxton, chairman of the Council, noted that, for the first time, leaders in the field of the arts throughout Canada had been brought together. He went on to state that advancements made in the arts since the end of the war have matched the general progress of Canada's prosperity.

The meeting was held at the Royal Military College in Kingston recently.

Applicants Invited By The SEC For Western Weekend

A cultural and social exchange week-end with Western University at London, Ontario, will take place Feb. 6-9. The SEC is unable to subsidize any McGill students, but is accepting applications from those who wish to go at their own expense. The deadline for applications is Thursday at 5 pm. Applications are obtainable from George at the Tuck Shop.

Harvard Increases All Tuition Fees

Harvard University has announced that there will be an increase in tuition fees together with an augmentation in the salaries of the professors.

This change will be effective as of September 1958. Tuition will be raised from \$1000 to \$1250 in the undergraduate schools and from \$800 to \$1000 in the graduate school.

President Nathan Pusey stated in his announcement of the salary raises, "Outstanding teachers must be decently paid. These increases do not go far enough. They are part of a long range programme."

UN Club Sponsors Iranian Diplomat In Political Talks

Dr. Nasrollah Fatemi, chief of the Iranian Delegation to the U.N., will speak on "Psychosomatic Politics of the Middle East" today at 1 pm in the Union Ballroom.

Persian born Dr. Nasrollah Saifpour Fatemi, a direct descendant from Prophet Mohammed's only daughter Fatima, is presently Professor of Social Science at Farleigh Dickenson University and has had an active career as statesman diplomat, author and educator.

As a diplomat, Dr. Fatemi represented Iran at UNESCO National Conference in 1948 and the International Congress of Americanists in New York City in 1949. He was Iran's delegate to the United Nations, a member of the Iranian Mission to the Security Council, and Economic and Political Advisor to the Iranian Permanent Delegation of the United Nations.

He has lectured on campuses of some 45 American and Canadian universities and has participated in many of the conferences and conventions on Middle Eastern affairs.

Carnival Weekend Set For Feb. 20-22

The eleventh annual Winter Carnival will take place this year on Feb. 20, 21, 22.

The Carnival events will begin on Thursday, Feb. 20 with a torch light parade up Mount Royal, terminating at Beaver Lake. Here, with the Ice Walls as a backdrop, there will be a skating exhibition and a fireworks display, followed later in the evening by dancing at the Chalet. Music is

to be provided by a local band.

The International Debating Conference will take place on Friday. It is the largest of such conferences in the British Commonwealth, with universities from all over North America participating. This round-robin type contest continues until Saturday.

An invitation ski meet will be held at Mont Gabriel with 6 men's colleges (3 from the U.S.) and 4 women's colleges contending.

The highlight of the Carnival is Forum Night which includes the crowning of the Carnival Queen, a hockey game between the University of Montreal and McGill, and the annual Ice Review.

Saturday's events will include ski jumping on the University of Montreal's ski hill, two performances of the International Carnival Review, and the Carnival Ball Saturday night in the Sir Arthur Currie Gym.

FLAG MISSING

NOTICE: The person who borrowed a Canadian flag from the Union over the weekend is reminded that Henry Cross is as good a patriot as he and/or she, and would appreciate having it back. Please wrap it up and leave it with George in the Tuck Shop. A reward is offered.

CAMP TAMAKWA

ALGONQUIN PARK — HUNTSVILLE, ONT.

Requires STAFF for the coming season. Varied positions open. Excellent remuneration. Must be at least 19 years of age and have had previous camping experience.

Write for more details to Mr. LOU HANDLER, Director, Camp Tamakwa, 18090 Wyoming, Detroit 21, Michigan.

PINE VALLEY CAMP

Applications are now being accepted for experienced male and female counsellors. Swimming and Tripping specialist also required.

Apply:

Mr. Moe Bass

UNIVERSITY EMPLOYMENT SERVICE

"Calibre Of College Hockey Not What It Was" - Reardon

by Irving Fish

Many people have asked the question — 'Why is it that college hockey players do not go into professional hockey anymore?' Well, frankly, we did not know the answer to this question, so we decided to go to a source who might help clear up the mystery. The source was Kenny Reardon, vice-president of the Canadian Hockey Club and 'boss' of the vast Canadian farm system.

According to Reardon, a promising hockey prospect who enters university at about eighteen years of age, can do one of two things. 1) he can play 'amateur' hockey for a team such as the Junior Canadiens, or 2) he can play hockey for his university squad.

LONGER SEASON

If he plays minor league hockey, his season starts in mid-October, and ends sometime in April. With so many practices and games (Junior Canadiens play about 60 games per season) and so much travelling to do, the student is bound to fall behind in his studies. By the time the season is over, it is too late to catch up in his work unless he is extremely brilliant, and so he barely gets through the first year by the skin of his teeth, and then he either gives up his education and continues on his hockey career, (which is rarely ever done) or he gives up his hockey career and continues his studies.

KEN REARDON

"If the prospect plays hockey for the university squad his chances for a career in professional hockey are slim indeed! The calibre of college hockey today is far too inferior for a fellow to make the jump from college to professional ranks. When a kid gets out of college he is about twenty-one or twenty-two years old. He has played for four years against what is at best hockey players of mediocre calibre. He has played about (4 times 5, or) sixty games in those four years.

"Compare him with a player who has come up through the ranks. At seventeen, they played in the same league and were about of equal calibre. At eighteen Joe College played for the University squad while the other fellow played junior hockey. At 19 Joe College is still playing university hockey, while our boy is playing senior, and so on. Add this to the better physical condition which the non-student is in, and you have a superior hockey player.

"The good hockey players who want a college education, and at the same time want to play hockey, go to American universities such as Michigan State and Denver, where they can obtain athletic scholarships. In Canadian universities this is not thought of as ethical. Apparently these scholarships pay for themselves, however, since they pack the rinks at the American college games. Do you realise that they get as many as 7000

people attending a college hockey game? Why that represents more than we even hope to get for a Royals game nowadays.

AMERICAN COLLEGES

"Part of the reason that the game is so popular down there is that they have a good calibre of hockey. The result is that the kids who attend the college games enjoy what they see and start to play the game. Although there is a lack of outdoor skating rinks, the boys play at the college rinks (which are beautiful). Why I can see the day when the United States will be producing first class hockey players! And it isn't far off either.

"Right now there is little comparison between the best class of hockey

played in certain US colleges and here at the Canadian ones. (This fact was borne out recently when the Canadian Intercollegiate champions, the Toronto Varsity Blues, were trounced by the Michigan State and Colorado University squads.

You are probably wondering how Johnny Pierson (whom the Bruins yanked from under our noses) and Jack Gelineau made the jump? Well, the amateur players weren't as good then as they are now. At that time they did not play as much hockey in the minors as they do today. They were not paid as much either.

"So, summing it all up, unless there are some drastic changes in the Canadian college hockey set-up, there will be very few players who will come out of colleges and make a successful career out of professional hockey."

engineering physics

...its application and career possibilities with

CANADIAN CHEMICAL COMPANY, LIMITED

Q. What is Canadian Chemical?

A. A young, progressive and fast-growing Canadian company. Its \$75,000,000 plant on a 430-acre site at Edmonton, Alberta, consists of 3 plants — a petrochemical unit, a cellulose acetate manufacturing unit, and a filament yarn plant. It has its own power plant and water treating facilities to supply steam, electricity, water and compressed air. The Company also has technical facilities necessary to provide for control of the quality of its products and for the development of new processes and products.

Q. What do we make at Edmonton?

A. Canadian Chemical's three integrated plants at Edmonton use the products of Canada's forests and vast oil fields... producing for world markets high-quality supplies of

ORGANIC CHEMICALS

CELLULOSE ACETATE FLAKE

ACETATE YARN AND STAPLE FIBRE

Q. What are my job opportunities?

A. Our Engineering Department is one of the largest and most diversified in Canada. Our instrument engineers are responsible for the control of all the varied processes throughout the plant. As one of them you would be utilizing your training in such practical problems as:

1. Applying the fundamentals of physics, chemistry and electronics, and the latest process control techniques, to interesting phases of instrument design and application.
2. Developing new instruments to meet the special requirements of new processes.
3. Controlling product quality within rigid specification limits.

Challenging job opportunities also exist for mechanical engineers, chemical engineers, chemistry graduates and electrical engineers — as discussed in other ads of this series.
